

DB-4 Inline Duckbill Check Valve

- Fits inside pipe I.D.
- Fastened with internal expansion clamp
- Features all-elastomer, virtually maintenance-free design
- Closes on entrapped solids

The DB-4 model is an insertable rubber check valve providing one way flow control.

Fixed in place inside the pipe using a special clamp that expands outward.

The DB-4 bill is shaped like a wedge to allow it to be installed inside of a pipe.

Each clamp has four pre-drilled holes to allow installation of anchors/bolts into the pipe.

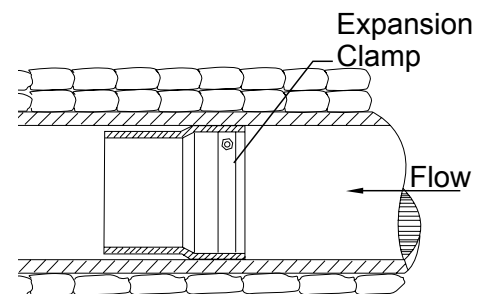

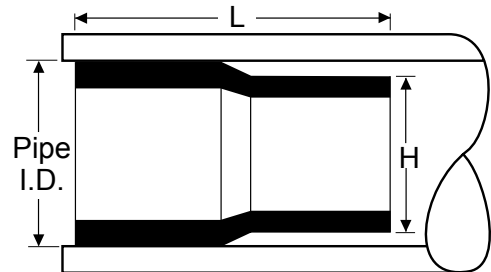

Materials of Construction

- **Elastomers:** Natural Rubber (NR), EPDM, NBR, Neoprene
- **Expansion Clamps:** 316 Stainless Steel

Model: DB-4

Installed

Pipe ID size	L = Length	H = Height	Pressure rating
